

# Opportunity to Purchase Pending Issuance Units

## Wales

### Project Highlights

- Woodland will sequester more than 2,192 tonnes CO<sub>2</sub>e over 50 years.
- Project covers 14.57 hectares and was planted in 2019 with native broadleaf and commercial timber species.
- The scheme will provide excellent value to the local economy.

# Project Background

This woodland creation project will produce good quality timber which in time will store carbon long-term in both furniture and construction, whilst also providing excellent value to the local economy.

The woodland enhances the surrounding landscape, with native species developing the already superb biodiversity credentials of the area.

The site was planted with native broadleaf and commercial species in 2019 and is yet to be registered.

*Projected Carbon Sequestration Volumes over Project's Life Cycle*

Verification: years since start date	Vintage start date	Vintage end date	Total PIUs in vintage to be listed	PIUs to Buffer	PIUs to Project
5	01 April 2019	31 March 2024	26	5	21
